

Domande esame Bioplastics 16/6

Giosafatto

1-the procedure to make a film from waste (selection of the source)

-Biopolimers, Hydrocholloid molecules: starch (describe it from the chemical point of view), how to make it thermoplastic

-Barrier Properties, how does the permeabilimeter work?

Pezzella

-Commento sui risultati ottenuti durante le esercitazioni, rappresentare su grafico le proprietà meccaniche dei film

-How can biodegradability be measured?

-Which technque can we apply to determine the molecular weight?

-What is the Polydispersity index?
